SENIOR JAVA BACKEND ENGINEER

Senior Java Backend Engineer with 3.5 years of experience building scalable distributed systems and high-performance backend platforms using Java, Spring Boot, Microservices, REST APIs, SQL, Kafka, and AWS. Strong expertise in system design, cloud-native architecture, reliability engineering, performance optimization, object-oriented design, and ownership of production services.

SKILLS

Languages: Java, SQL, Python | **Frameworks:** Spring Boot, Spring MVC, Spring Security, REST APIs, Microservices, JPA, Maven
Databases: MySQL, PostgreSQL, Cassandra, MongoDB, Redis, DynamoDB, S3 | **Messaging:** Kafka, MQTT, Protocol Buffers, JSON
Cloud/DevOps: AWS Cloud, Docker, Jenkins, Git, CI/CD, Kubernetes (EKS), ECS, Terraform | **Methods:** Agile, Scrum

CORE COMPETENCIES

Data Structures & Algorithms | Design Patterns | System Design | Scalable APIs | Distributed Systems | Performance Tuning | CI/CD | Cloud Architecture | Reliability | Problem Solving | Agile Delivery

EXPERIENCE

Tata Elxsi — Senior Software Engineer

Mar 2025 – Present | Bengaluru

- Designed and delivered scalable Java Spring Boot microservices for enterprise client platforms, improving service scalability by **35%** and reducing release turnaround time by **25%**.
- Built and optimized **15+** REST APIs for mobile/web applications, reducing average response latency by **30%**, improving scalability, accelerating partner integrations, and optimizing SQL-backed data access.
- Developed real-time simulation tools that reduced testing effort by **40%**.
- Implemented AWS-based deployments with monitoring and high availability, achieving **99.9%** service uptime across critical workloads.
- Led engineering quality initiatives using **JUnit testing**, **SonarQube**, **Trivy**, **GitLeaks**, and **FossID**, reducing critical vulnerabilities by **90%**, strengthening CI pipelines, and improving release readiness.
- Communicated effectively with product, QA, and engineering teams to deliver on-time releases while enforcing secure coding and quality standards.

Tata Elxsi — Software Engineer

Feb 2023 – Feb 2025 | Bengaluru

- Developed backend services for automotive telematics platform using Java, Spring Boot, Python, AWS, and SQL, supporting **10K+** connected devices across production environments with high availability.
- Implemented OTA update integrations using secure backend workflows, improving deployment efficiency by **30%**, and enhancing platform interoperability.
- Automated CI/CD workflows using Jenkins, Docker, and Git, reducing deployment effort by **50%** and increasing release frequency.
- Built internal AI chatbot and analytics dashboard during innovation initiatives, cutting manual support effort by **30%**.

PRODUCT IMPACT HIGHLIGHTS

- Built production-ready backend services handling real-time event ingestion, processing and monitoring.
- Delivered 8+ customer-facing backend features that improved release velocity and user experience.

CERTIFICATIONS

- Java Spring Boot Microservices Certification
- Core Java Certification

ACHIEVEMENTS

- Stellar Contribution Award for AWS Marketplace integration and delivery excellence.
- Two Extra Mile Awards for ownership, innovation, and client impact.

EDUCATION

B.E. Computer Science and Engineering — Anna University, Trichy (June 2018 – June 2022)
